Mr. C. A. Fredrickson
Procter & Gamble Company
Winton Hill Technical Center
6700 Center Hill Road
Cincinnati, Ohio 45224

Dear Mr. Fredrickson:

In the recent telephone conversation and visit you had with George Fague safe handling and toxicological effects of Pydraul 312 were discussed. Extensive work was done in this area at the time Pydraul 312 was formulated and went through its intensive field tests.

Following the toxicological testing of Pydraul 312 J. T. Garrett of our Medical Department sent a memo to my attention summarizing the results of these studies. We believe this information plus the data on handling the fluid contained in the technical bulletins will answer questions in this area.

Should you need additional information please let us know.

Very truly yours,

D. F. Smith
Senior Product Specialist
Industrial Fluids
