Federal Office Building - Room 7033
550 Main Street
Cincinnati, Ohio 45202

Dear Dr. Johnson:

In view of the dangerously high levels of asbestos found during your agency's surveys of the Pittsburgh Corning plant in Tyler, Texas, both the local union and myself would appreciate a report from you stating in detail the industrial hygiene engineering improvements that are needed to make the environment of that plant safe. In that report, would you also please make suggestions as to alternative raw materials, proper medical examinations, and an adequate monitoring system.

Please send a copy to me and to the OCAW International Representative for that local: Mr. Billie Stokes
Box 197
Greenwood, La. 71033.
It is necessary that we receive such a report before the 20th of October.

Please keep in touch.

Sincerely yours,

Steve Wodka
