SUBJECT
Adhesives Survey - New York

REFERENCE :

TO [redacted]

Two prospects covered on 3/19/75.

1. Peter Cooper Co., - Bronx - Michael Oliveri -
This operation primarily in animal glues. Cooper does send other types into area, but from plants outside including one in Albany area.

2. Adhesive Products Co., - Bronx.
This was a company I used to call on many years ago. There has been virtually no growth since then. They still use plasticizer for both PVAc Adhesive and plastisols. Ken Kauffman - Buyer - was however affraid to pass on any pertinent information and referred me to Mr. Medwick, President who was not in. This area of the Bronx is so bad that I was delighted to get out of it with my scalp. I will not return, but will try to get Medwick on phone.
