Re: Shell Oil Company

Dear Allan:

This will confirm our telephone conversation of today. It has come to my attention that many of my clients who are Shell Oil employees have had asbestos exposure in excess of the OSHA action limits within the last two (2) years while employed at Shell Oil. Obviously, I have tried to keep Shell Oil out of this litigation in the past, and I am very concerned about the continuing exposure to the Shell Oil employees.

I would request that whenever a Shell Oil employee has been exposed to asbestos, Shell needs to make a record of that in the individual employee's file so that in the event he becomes disabled in the future, the documentation of his asbestos exposure will be of record. I believe this would be required by the OSHA Rules and Regulations CFR 1910 and 1926.

I am not wanting to cause problems, but I am making a strong recommendation to protect both your client and my client's respective interests regarding the hazards associated with working with or around asbestos.

Sincerely,

RANDALL A. BONO

Re: Elmer Sanders

Dear Allan:

I understand you are still the attorney for Shell Oil Company in regard to asbestos disease claims. As you are aware, in the past, I have avoided bringing Shell Oil in as a direct defendant in the Madison County Asbestos litigation. I finally found a case where I may be forced to bring in Shell Oil.

My client, Elmer Sanders, was employed at Shell Oil between 1942 and 1951 and worked as a carpenter. During that time, he was exposed to numerous asbestos containing products, primarly pipecovering and block insulation used at the refinery. I write to you now to see if Shell Oil would be interested in compensating Mr. Sanders for his asbestos disease privately and short of litigation. Mr. Sanders is suffering from mesothelioma and, as you are aware, this disease is caused by asbestos, is incurable and terminal.

I intend to file this case within the week and seek to have an immediate trial while he is alive. I enclose a copy of a medical report from Dr. Rouse.

Please find out immediately if Shell Oil is interested in attempting to work something out prior to the filing of this Complaint.

Sincerely,

RANDALL A. BONO

Re: Elmer Sanders

TO WHOM IT MAY CONCERN:

Mr. Elmer Sanders suffers mesothelioma, brought on by exposure to asbestos. There is no effective treatment for this disease and Mr. Sanders is quite ill from this.

Sincerely,

E. T. Rouse, LLL, M.D.
