INTERNATIONAL HARVESTER COMPANY

Comments:

A. Eaton, regardless of brake size (except where noted), is the standard brake on all Harvester heavy-duty model trucks. These models are as follows:

Paystar	- Trucks and Tractors
Conventional	- Trucks and Tractors
C.O.E.	- C09670 Etc.

Rockwell brakes are a premium of $23.00/4 x 2 and $46.00/6 x 4 on the above models listed under "A".

B. Rockwell, regardless of brake size (except where noted), is the standard brake on all Harvester "S" series models and Cargo Star models.

Eaton brakes are a premium of $23.00/4 x 2 and $46.00/6 x 4 on the above model listed in "B".

Notes:

1. IHC plans to discourage all disc brake orders where at all possible. They are promoting the Eaton lightweight brake with non-asbestos linings in place of air disc brake orders. A $26.00 premium is charge per axle for non-asbestos linings.

2. Our steer axles are not available at this time. No timetable has been established to have them available. The IHC Dana situation has been the factor that has and will continue to hold up our progress.
