ASBESTOS DUST CONTROL

Our interpretation of government regulations for asbestos dust control can be met. There are still some areas which are not entirely clear, such as:

- Specific records to be kept.
- Where posting of warning signs are required.
- Extent of medical examinations.
- Extent of vacuum cleaning required.
- Requirement of local exhaust system for use with hand tools.
- Respiratory protection.

Engineering Standard on Asbestos Dust Control, S4T, has not been issued as yet. This Standard would be very helpful to the plants.

A meeting of Du Pont representatives in Wilmington on June 2, 1972, should clear up items of concern with the government asbestos dust control regulations. Chattanooga Plant plans to send Medical Supervisor, Environmental Control Supervisor, and Maintenance Supervisor-Field to this meeting.
