A Thank you very much.

(Whereupon, pause.)

A Indeed that is what it says, yes, sir.

Q Thank you very much.

Isn't it true, Doctor, that while you like what you see on these numbers, you don't agree with any of these men's recommendations or conclusions; isn't that right, sir?

A Well, let's understand that the data are the data and one can then choose to follow their recommendation or have a greater understanding of those recommendations.

Indeed they did make certain recommendations, but their data are what I presented here.

Q And it is the data you rely on, but you don't agree with the recommendations and conclusions that they reach?

A No, I never stated that I didn't agree with them or disagree with them. I only presented the data.
