prepared by input from members of the committee and this -- all this procedures, we were trying to educate people about the hazards of asbestos in a book that they might look at. I thought we were being good people.

Q Did you mention any distinction between fiber types in terms of hazards posed by asbestos --

A I don't --

Q -- in this booklet?

A I don't believe so.

Q Did you write this other document?

A I digested it from this 197- -- what I believe was a 1978 booklet that I have mentioned a couple of times before, digested from that. So the wording I might have gotten together with the committee members and sent it around rather than having a meeting, let them look at it first and say okay.

Q Did you agree with the statements and information in the writings?

A Generally, yes.

Q Did you solicit any input from any other kind of asbestos association in preparing either of these documents?

MR. FRIESTEDT: Objection to the form of the question. What's the Asbestos Association?
