PCB - SAMPLER
INCINERATOR AREA
Stewart/Buckley Memo 9/8/72

Clarrie Buckley

Please have a sampler installed as close to Incinerator Area as possible. Relocate from 2-G. Consider northeast corner of department. Sampler should be flip-flop and tip designed for isokinetic sampling. Point upstream?

Also, what are flow quantities? Interim PNA has shut down.

Let's review.

Edward Stewart
Technical Services Department

Call from Buckley 12/5 Meeting scheduled 12/11

Buckley to have sampler installed @ 2K
McCutchan to arrange having sewer flows diverted
so Saintoin does not flow through 2K, 2M.
