INDEX

HEATING VENTILATING AIR CONDITIONING GUIDE 1939

Technical Data Section

Chapters 1-45 and Pages 1-856

A

Abbreviations, 846
Absolute humidity, 8, 835
Absolute pressure, 823, 835
Absolute temperature, 835
Absolute zero, 835
Absorption, *(see also Regain)*
  agents, 43
  as means of dehumidification, 486
  by building materials, 153
  of solar radiation by glass, 150
  of sound, 609
  system, 486, 487
Acceleration, 835
  due to gravity, 835
Acclimatization, 54
Acoustics, acoustical, 601
  treatment, 609
Activated alumina, 40
Adiabatic saturation, 11, 521, 835
  driers, 667
Adjustable speed motor, 720, 724, 725, 726
Adsorption
  agents, 40
  as means of dehumidification, 484
  systems
    alumina, 485
    silica gel, 485
Air
  adiabatic saturation of, 11
  amount per person, 68
  atmospheric, 1
  changes of, indoors, 49, 127
  cleaning devices, 537, 835
    A.S.H.V.E. code for, 537
    requirements of, 537
    types of, 538
  composition of, 1, 49
  density of, 6
  distribution of, 70, 397, 565
    balancing system, 578
    for comfort, 67
    effect of turning blades, 572
    factors in room cooling, 570
    factors in room heating, 572
    grille locations, 566
    natural ventilation, 687
    railway air conditioning, 578, 628
    residence, 402
    with unit air conditioners, 452
    with unit heaters, 437
    with unit ventilators, 441
  dry, 1, 4, 8, 59, 838
  drying agents, 35, 40
  ducts, 581, *(see also Ducts, Air)*
  excess, 168
  exfiltration, 119
  filtration, 233, 419
Air *(continued)*
  flow, 70, 75
    formulae, 581
    into a hood, 656
    loudness chart, 574
    natural, measurement of, 694
    through openings, 689
  friction of, in pipes, 585, 586
  impurities in, 77
    size of, 78
  ionization of, 73
  leakage, 119, 125
  minimum outdoor, requirements, 70
  mixtures with water vapor, 12
  moist, 66
  motion, 70, 72
  movement, measurement of, 827
  odors in, 49
  optimum conditions, 60
    indoors in summer, 66
  outlet noises, 572
  outside, introduced,
    through cracks, 124, 127
    through doors, 125
    unit air conditioners, 451
  pollution, 77
    abatement of, 82
    effect on health, 81
  properties of, 3, 4
  quality, 68
  quantity necessary,
    for ventilation, 70, 627
  recirculation of, 75
  saturated, 1, 5, 10, 843
  secondary, 168
  space conductances, 91
  speeds to convey material, 660
  standard, 843
  still, 55
  summer, conditions, 66
  velocity, *(see Velocity, Air)*
  vitiation, 49
  volume, 12
  washer, 517, 835 *(see also Washer, Air)*
    operation of, 706
    saturation efficiency, 520
  weight of, 6
Air conditioning, 49, 521, 835, *(see also Air)*
  air change per occupant, 69
  chemical factors, 53, 79
  comfort chart, 61, 62
  in disease treatment, 615
  fundamentals of, 1
  hospital, 615
  with ice, 490
  industrial, 639
    apparatus for, 521
    automatic control, 699
    exhaust systems, 651
    process conditions, 639
    unit coolers, 445

Air conditioning *(continued)*
  objective of, 1
  physical factors, 49
  recirculation, 75
  units, 448
Algae formations, 532
Allergic disorders, 622
  classification of, 622
  treatment of,
    apparatus for, 622
    limitations in, 623
Alternating current motor, 721
Altitude, 189
Alumina system of adsorption, 40, 486
Aluminum foil, 92
Aluminum oxide, 40
Ammonia, 35, 36, 529
Anemometer, 828, 835
Anesthesia, 615
  apparatus, 615
  effect of, 616
  inflammability, 616
Anthracite, 172, 174, *(see also Coal)*
  stokers, 211
Apartment houses,
  hot water supply to, 815
  steam consumption, 246
  stokers suitable for, 212
Appendicitis, 617
Arthritis, 625
A.S.H.V.E. Codes and Standards, 254, 552, 696, 854
A.S.M.E. boiler construction code, 264
Artificial fever, 620
  conditions for, 621
  diseases treated, 621
  limits for, 621
  production of, 621
Asbestos, 741
Ash,
  cared for by stokers, 207
  fly, 77
Asphyxia, 623
Asthma, 622, 623
Atelectasis, 623
Atmosphere, standard, 823
Atmospheric steam heating system, *(see also Steam Heating Systems)*
Atmospheric water cooling apparatus, 525
  design of, 528, 529
  efficiency of, 530, 534
Atomization,
  for humidifying, 522
  of oil, 219
Attic fans, 460
Automatic control, 404, 699, *(see also Controls)*
Automatic fuel burning equipment, 207
Awnings, 154, 412
Axial velocity formula, for hoods, 655

B

Babcock's formula for steam flow, 309, 782
Baby care, *(see Nurseries)*
Baffles, 836
Balancing air distribution system, 578
Bananas, 646
Barn ventilation, 695
Barometer,
  aneroid, 824
  mercurial, 825
Barometric pressure, 189, 823
Bends, expansion, 368
BET, British equivalent temperature, 772
Biochemical reactions, control of, 646
Bituminous coal, 173, 176
Blast, 836
Blower, blowers, 549, *(see also Fans)*
  standard test code for, 552
Body,
  human, surface area, 69
  odors, 69
Boiler, boilers, 249, 836
  allowances, 258, 818
Boiler *(continued)*
  A.S.H.V.E. test codes, 254, 855
  A.S.M.E. construction code, 264
  baffles, 401, 836
  capacity, 249, 437
  care during summer, 267
  cast-iron, 249
  cleaning, 266
  codes, 254
  combustion rate, 250
  connections, 321
  controls, 714
  conversion, 262
  design of, 252
  draft loss through, 195
  efficiency of, 253, 257
  for electric steam heating, 761
  erection of, 265
  fittings, 264
  gas-fired, 226, 251, 262
  grate area, 261
  heat transfer rates, 253
  heating surface, 253, 836
  horsepower, 257, 836
  installation, 262, 265
  insulation, 267
  limitations, 263
  low pressure, construction code, 264
  maintenance, 265
  operation, 265
  output, 256
  performance curves, 260
  pick up, 258
  pipe tax, 259
  ratings of, 254, 255
  scale in, 266
  selection of, 257, 260, 261
  settings, 222, 252
  special, 251
  steel, 249
  troubles with, 266
  types of, 246
  warming-up allowance, 258, 260
  water line, 264
Boiling point of water, 28
Booster,
  fans, 396, 417
Booths, spray, 658
Bourdon tube, 824
Boyle's law, 7
Brake horsepower, heat equivalent of, 139
Breeching, draft loss through, 199
Brine, 450
British equivalent temperature, 772
British thermal unit, 836
Building, buildings,
  absorption coefficients, 153
  air velocities in, 587
  construction, heat transmission of, 88, 95
  fuel requirements of, 233
  hot water supply to, 810, 813
  intermittently heated, 139
  load factors, 246
  materials, heat transmission of, 95
  noise in, 605
  steam consumption, 246
  tall, infiltration in, 126
  water supply to, 799
Burner, burners,
  automatic equipment, 207
  coal, 207
  conversion, 228
  gas, 226
  oil, 218
By-pass method, 416, 836

C

Cabinets, *(see Enclosures)*
Calorie, 836
Calorific values,
  coal, 173
  gas, 182
  oil, 180, 181
