Mr. A. Zanona
Transmission Engineer
Commonwealth Edison Company
Maywood, Illinois 60153

Dear Mr. Zanona:

Your copy of the report "Polymers Designed For Extra High Voltage Applications" is being returned by separate mail. Thank you very much for loaning us this copy. We duplicated a few sections from the report which are of particular interest, but will not quote their contents outside the company.

Since our conversation, I have been in contact with Anaconda who felt our new fluid might possibly be a replacement for polybutene in pipe-type cables. Of course, considerable further discussions and testing will have to be accomplished before such a conclusion could be reached. If there is any other company you especially feel we should contact concerning this, I would appreciate your letting me know.

Thank you again for sending the report and for taking the time to discuss pipe-type cables with me. If there is any way I can be of help to you, please let me know.

Yours truly,

Michael F. Baber
Project Manager
Commercial Development
