Doctor recommended by Stassens

(18) Dr. J. Roels Ave. des Azalees # 32

KE 0013498

N17455

Dr. Stassen requested the
privilege of translating all articles
into French, German and to
publish it with authority of the
department of which he is a
member.

also recommended only
as inspectors of mining plants
(as best expert available) not only
for Belgium but also for France,
Germany, Denmark etc. anywhere
in Europe. Apparently quite
willing to accept a good fee
for such service.

To these proposals I replied
guardedly that the published
articles were copyrighted in USA
and could not appear over name
of any other author. To the
effect that all technical services
must be arranged for by London
