PORTSMOUTH NAVAL SHIPYARD

PYDRAUL 150

We have been informed through company sources that the Navy at the Portsmouth Naval Shipyard is quite concerned over the toxicity of our Pydraul 150. I discussed this matter with Mr. Wheeler, our company Industrial Hygienist, and he has agreed to pay a visit to this installation sometime during the week of September 19.

We would appreciate it very much if you would inform the personnel at the Navy Shipyards of Mr. Wheeler's forthcoming visit, so that he is able to see all of the personnel concerned with the problem. He will inform you in the very near future as to the exact date he will be available for this contact, and you in turn can inform the Portsmouth Naval Shipyard.

Best personal regards.
