Cincinnati, Ohio

Gentlemen:

Enclosed are samples of pumice as received and as used for polishing glass on a cork wheel.

Please make electron microscope pictures and give us some idea as to particle size. Please charge to claim O.D. 10913, Clifford Shepherd.

Very truly yours,

DeWitt Huffman
Industrial Hygiene Engineer

Dr. Colin McPherson
Room 315
University Hospital
Columbus, Ohio

Dear Dr. McPherson:

Accompanying this letter are samples of pumice used in the buffing or polishing of glass. One of the samples is new pumice as received and the other sample is pumice as used. The pumice is in a trough under a cork wheel suspended in water in the form of a slurry and both water and pumice are replaced as needed.

Please check for staphylococci and steptococci bacteria in both samples and charge to O.D. 109134, Clifford Shepherd.

Very truly yours,

DeWitt Huffman
Industrial Hygiene Engineer
