ASBESTOS PROGRAM
1985 UPDATE

The Workers' Compensation Section of Safety, Health and Environmental Affairs Division is responsible for periodic updating of information on the asbestos program.

Because this information is needed to meet annual reporting requirements, please complete the attached questionnaire (Tables I and II) for your department and return them to me by January 15, 1986. The numbers reported on these questionnaires will be added to last year's results producing cumulative totals.

In reporting numbers of employees and pensioners, the following guidelines will be used:

- Only cases with Du Pont causality should be classified.
- Only cases evaluated and/or classified during 1985 should be reported.
- The landlord department at a site should report the total site, unless the departments at the site agree otherwise.
- The employment status at the time of classification determines if the individual is counted on the active employee list or the pensioner (former employee) list.
- All pensioners and employees being provided medical assistance, counseling, etc., at a site are treated as that site's responsibility regardless of their department roll and exempt/nonexempt status.

A report showing the results of last year's questionnaires is also attached. Please note on the report any changes and return with the attached questionnaire. For example, a case that was reclassified during 1985 should be noted on this report by reducing the old classification count by one and increasing the new classification count by one.

If you have any questions, contact me (77-33972) or A. G. Cropper (77-43446).
