Mr. J. A. Carleton
Newport News Shipbuilding and Dry Dock Company
Newport News, Virginia

Dear Mr. Carleton:

Thinking about the #2092 cloth in which I have written you about in another letter today, I am attaching a bulletin that we had gotten out on this material and I thought it would be interesting for you to know that actually, this #2092 cloth was created to save money and do a better job even against something as cheap as cotton brattice cloth. Some of the yards have found that what we state in this bulletin is true, in fact, this is where we got our information which is in this bulletin. Although cotton brattice cloth is far less expensive per yard than our #2092 when all of the features and the final cost starting from the time the two cloths are laid on the floor to the end of the finished job is considered, you get a better job, less waste and a less expensive finished job.

I thought you would be interested in having this bulletin on #2092 and this letter because you, too, may be using brattice cloth as I assume you are and I would like to have you consider this as a separate point just to see what your experience might be. If I can be of any further help along this line, I will be delighted to have you call on us.

Yours very truly,

J. T. Griffin
Sales Manager
