SUBJ: PROPOSED CMA PANEL ON ETHYLENE AND RELATED PRODUCTS

VISTA

Attached is information regarding a proposal to form a Chemstar panel on Ethylene and related products. This was initiated by Exxon. I'm not sure I agree with Exxon's premise on why the panel is needed but I need your thoughts on the desirability of Vista's participation.

An exploratory meeting is being held in Washington on October 9th. I need your thoughts on the following:

1. Is it need?
2. Should we participate?
3. If so, who should attend the exploratory meeting.

Please comment to me by September 27.
