Dr. Julius Sendroy, Jr.
Chief Chemist
Naval Medical Research Institute
National Naval Medical Center
Bethesda 14, Maryland

Dear Doctor Sendroy:

Enclosed are copies of reprints discussing the toxicity of Aroclors and 2-Ethylhexyl Diphenyl Phosphate. You will recall that I promised to send you these when we visited you recently in Washington. I am sorry that there has been some delay but this was occasioned by a move of all of our general offices from the city of St. Louis to St. Louis County and activities have been rather hectic.

Mr. Sido and I appreciated very much the opportunity of meeting with you and your associates and look forward to seeing a copy of your forthcoming report on the work which you have conducted on hydraulic fluids.

I hope that during my next visit to Washington, I will have an opportunity to visit you for a longer period and perhaps take a tour of your facilities, if such is permitted.

Very truly yours,

Elmer P. Wheeler
Assistant Director
Medical Department
