Monsanto Aroclor Studies

B851
C863
J899
J900

Elmer Wheeler is sending us a list of their studies in progress on Aroclors or Aroclor substitutes. He would like to have advanced billing for some of these. He also would like schedule dates for all of them. He said his list will have some blanks and we should fill them in. He also indicated that he had not filled in the information regarding the last four Aroclors we tested. I believed they were MCS 1016, Aroclor 1221, Aroclor 5460 and Aroclor 5430.

As soon as we revise the list, we are to send invoices for these studies. They want to start making some advanced payments.
