THIS COPY FOR

Re: New Product - Low Cost Blow-on Material

Mr. E. D. Carpenter has made arrangements with Mr. Bill Spawn of the Spawn & Collawn, Plastering Firm, to use 2 tons of subject material on an experimental basis on the new Asbury Methodist Church which is being built in the Oak Cliff section of Dallas. The job will be ready within about two weeks. Mr. Carpenter has requested that the material be included in the next car of plaster coming to Macatee, Incorporated, Dallas, Texas.

Mr. Carpenter has requested that we let him know at once if there will be any delay involved in furnishing the material for the test. Through copy of this letter we are requesting Mr. Zelms to advise this office whether he anticipates any delay in the manufacture of the material.

We will furnish the Acme Plant with a sample requisition and shipping instructions in the very near future. We also will advise as to the exact date the plastering contractor will start using the material so that the plant can arrange to have a laboratory representative present at the time of the application.

Note
Leo Rodenborn states that sewn end bags do not fill good with this product. Should be pasted end bags
