As you requested, here are some suggestions for the Asbestos Training Course which you are planning for this Spring.

Pre-Course Survey

Question enrollees as to what they expect to gain from the course. (This may help you in deciding topics and duration for topics.)

- Request that each participant bring a copy of their plant's standard operating procedures for asbestos insulation removal (for classroom participation).

Suggested Topics

- General Overview of Asbestos Standards 60 minutes
 - OSHA - History of 1910.1001, Definitions, Limits, Specific Provisions.
 - Other governmental standards (EPA).
 - Du Pont Engineering Standard (S-4-T).
 - Other Du Pont standards available on asbestos (e.g., SN218P).
- A. Identification of Asbestos 30 minutes
 - Flame test, K2 test, microscopy (Haskell participation?).

- B. Methods of Monitoring & Analysis 30 minutes
(Have microscopes set up for people to inspect samples).
- Insulation Removal Procedures 60-90 minutes
Wet method and work practices.
Glove box - pipe enclosures.
Vacuum hook-ups.
(Call O. T. Skretvedt for name of outside contractor.)
 - Vacuum Cleaner Representatives (Nilfisk) 30-60 minutes
Demonstrate connections available to basic unit.
Maintenance of equipment.
 - Respirators & Personal Protective Equipment 45-60 minutes
 - Contractors
Legal could give guidelines as to what should be in a contract for insulation removal by outside contractors. 60 minutes
 - Medical Surveillance and/or Worker Compensation 60 minutes
 - Training 60 minutes
Provide an opportunity for attendees to see training materials available in order to comply with the training provision of ETS (stayed) or any future standard.
