Christine and Jackie,

I wanted to make you and the Governor aware that the EPA submitted yesterday to the Federal Register the Final Rule for "Air Quality Designations for the 2010 Sulfur Dioxide (SO₂) Primary National Ambient Air Quality Standard – Round 3 – Supplemental Amendment."

EPA is modifying the final designation for a portion of **Citrus County, Florida from Unclassifiable to Attainment/Unclassifiable** for the health-based national air quality for SO₂ (set in 2010) based on EPA's review of 2017 air quality data submitted by Florida. This designation affects the part of Citrus County surrounding the Crystal River Power Plant. All of Citrus County is designated Attainment/Unclassifiable. This modification takes effect on April 9, 2018.

Please see the PDF copy of the letter sent to Governor Scott today. If you have any questions, please feel free to contact me.

Regards,
Preston Cory
