Western Electric Company

W. E. Pumphrey - Department Chief - Chemical Processes - Engineering - Baltimore
E. S. Sauer - Engineer - Chemical Processes - Engineering - Baltimore
N. W. Murray, Jr. - Department Chief - Engineering - Buffalo Plant
J. R. Austin - Sr. Engineer - Engineering - Buffalo Plant
J. M. Wright - Buyer - 222 Broadway - New York
E. J. George - Senior Engineer - Baltimore

The two-day visit by our guests was centered around an objective of their specifying Santicizer 711 and our Phosphate Esters in their communication cable.

Last year Western Electric sales reached $4.9 billion and have installed 700,000,000 miles of communication wire and 93,000,000 telephones.

Our objectives are clear. This is an industry, an entire market, and thus the importance of this technical symposium.

Thank you for your participation.

WRIGHT
