paragraph.

(Whereupon, document tendered to witness.)

A I am familiar with that document.

Q Would it be fair to say that even before that time in 1970 and '73 there are internal Ford documents that reflect that the dust from the blowout is bad and was considered -- and even some of the asbestos dust was considered toxic by Ford personnel?

A I don't think that is exactly a correct type of a statement.

There certainly was data indicating that blowing out a brake with an air hose causes temporarily high level of fiber to be measured in the air, and there were recommendations made as far as procedures to reduce that level.

THE COURT: Excuse me, Mr. Anderson, if you wouldn't mind, you can put your arms on the edge of the bench. The chair won't move, but you can, sir.

THE WITNESS: Thank you.

THE COURT: You look more relaxed.

THE WITNESS: My back is a little sore.
