Subject: SO 3349 section (c)

Hi Shelly,

one approach to avoid having to identify every regulation & policy of every program that could put restrictions on energy development during land use planning would be to reference the land use planning handbook, with text that states something like:

Appendix C of the land use handbook identifies resource programs that may place restrictions on uses that could impact energy development. The specific restrictions considered would depend on the individual program's requirements, as identified in the laws, regulations, manuals, handbooks, and instruction memoranda governing each program.

I'm also including Leah & Heather on this email to see what they think of this suggestion.

OK, I want to make sure that I list the reference to the correct document. I have it listed as BLM Land Use Planning Handbook, H-1601-1 (March 11, 2005)

Is this correct? Following is the link to this document:

https://www.blm.gov/sites/blm.gov/files/uploads/Media_Library_BLM_Policy_Handbook_h1601-1.pdf

Thanks, Shelley
