You good people have served long and well as members of the Office Safety Committee, but I believe it's about time we should be finding replacements for you. As you know, the Office Safety Committee has consisted of a chairman and seven committee members, one of whom is a representative from the Loss Prevention and Safety Department. The members are appointed to serve for a one-year term and are appointed by the Safety and Housekeeping Action Committee (SHAC).

We would like for you, individually or as a committee, to recommend ten or twelve people that you think would make good Office Safety Committee members. The SHAC committee will consider your recommendations among others that they receive and select a committee and appoint a chairman by mid June. Hopefully, we will be able to have the new committee and the old committee meet in a joint session prior to their assuming full responsibility for the Office Safety Committee activities on July 1, 1980. Please let us have your recommendation by June 15. You may send them to me and I will review them with SHAC.
