DDT ANALYSIS - UNIVERSITY OF WISCONSIN

Memo PJAM to WBP dated 6/15/71

H. A. Vodden - 5470
W. R. Richard - T3A
R. W. Keller - 1760
E. S. Tucker - 1760

Mr. P. J. A. Marsh - 5040
Brussels

We have no supporting evidence to substantiate Professor G. R. Lee's results of DDT-soil studies at the University of Wisconsin and described in the Los Angeles Times article you sent.

Professor Lee has consistently supported extreme analytical precision and has achieved a reputation by casting analytical doubts. There may well be some laboratories which are submitting erroneous reports but it is difficult to deny that DDT (or PCB's) are not present in the environment.
