ADDENDUM
Research Product Proposal 425-143
Epoxy-Lined Transite Pipe and Fittings

The following should be added to the subject Product Proposal in the section titled "Health and Accident Hazards" (Page 5):

The sand blasting operation presents a potentially serious health hazard. Adequate dust collection equipment must be provided to assure maintenance of atmospheric control for silica to 5.0 million particles per cubic foot or less. Industrial Hygiene air samples should be executed at these locations at periodic intervals, as prescribed in the Manual of Standard Practices IH-97.
