Dr. Robert A. Kehoe
Kettering Laboratory for Applied Physiology
University of Cincinnati
Cincinnati, Ohio

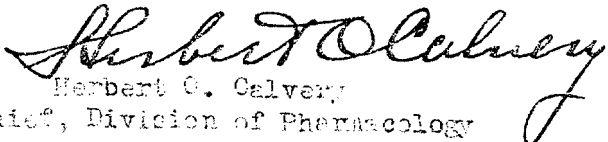

Dear Dr. Kehoe:

Dr. Dunbar has requested me to acknowledge receipt of the copy of your letter of February 3 to Mr. C. E. Chase. We appreciate very much indeed your having made to Mr. Chase a clear and concise statement of your stand with reference to certain matters with lead arsenate spray residues and tolerances for same.

I notice on the second page you have taken into consideration, in expressing your opinion, the composition of spray residue and recognizing the possible change in the lead arsenate due to weathering processes. I thought you might be interested in a paper published by Mr. Jack E. Baker of the Department of Agriculture entitled "Changes in Ratio of Lead to Arsenious Oxide in Lead Arsenate Residues on Apples." I am therefore enclosing a photostat of this paper.

Trusting that everything is going well with you and your work.
I am,

Sincerely yours,

Herbert G. Calvery
Chief, Division of Pharmacology
