

1 makes up environmental science is industrial hygiene?

2 A I would think so. There are a number of
3 overlaps.

4 Q Okay. I think you testified that you are
5 not, per se, an industrial hygienist; is that right?

6 A That is correct.

7 Q Okay. We heard yesterday from Dr. Fowler
8 about the letters CIH; are you familiar with those
9 letters?

10 A Yes, I am.

11 Q What do those mean?

12 A That is a certified industrial hygienist.
13 There is a group of industrial hygienists
14 that have an association and they will certify those,
15 they take a test and so on to learn about -- I guess
16 they learn about the specifics of industrial hygiene,
17 and then they take a formal test for this group, to be
18 certified by the group.

19 Q Okay. Am I correct in that you are not an
20 industrial hygienist, per se, and you are also not
21 certified by CIH, or by that procedure, right?
