TO ALL MEMBERS OF THE
SAFETY COMMITTEE

Gentlemen:

SUBJECT: Asbestos

As requested by the Board of Directors at the October 1971 meeting, the Association is forwarding to you as much information as it was able to secure regarding the activities of other Associations with regard to asbestos restrictions in construction and manufacturing.

The enclosed information is being passed on for your attention and you are asked to forward any of this information which you feel will be of value to your directors. As you will be able to see, all the information that we could acquire from other organizations was aimed basically at keeping their membership informed on the latest standards and restrictions. We were unable to find any materials specifically directed at developing safety standards for production methods to be used in handling asbestos. If you have any further information on this subject which you feel would be of value to the membership, please forward it to the Association office.

Yours very truly,

GYPSUM ASSOCIATION

D. R. Elwing, Secretary
Safety Committee
