SUBJ: 20 GALLON SHIPMENT OF 1412-A

VISTA

1412-A is classed by DOT as a combustible liquid. However, if a combustible liquid is shipped in containers of less than 110 gallons then no labeling, package specification, or paperwork requirements apply. We would want to assure that sturdy non-breakable containers and a durable fiberboard box were used however. To assure this, I strongly suggest you have Ponca City send a "sample-pak" to the terminal to be filled and returned to Ponca.
