Monsanto Company,
800 N. Londbergh Road,
ST. Louis, Missouri, 63166.

Attention: R. Emmet Kelly, M.D.,
Medical Director.

Dear Doctor Kelly:

This is in regard to a Monsanto product, Pydraul 150. I have been contacted by the Safety Division of Manitoba Rolling Mills, in regard to the hazards involved in the use of this product. I have some material before me on Pydraul 312, which was provided for the Rolling Mill people by Monsanto. However, it fails to list specifically which chlorinated hydrocarbons are present in the Pydraulsand in what concentration. I would also like a complete list of the decomposition products which occur on heating of the chemical.

Please note that any information obtained will be considered confidential.

Thanking you in advance.

Yours truly,

W. T. Grieve,
CHEMIST.
