DANA CORPORATION

Victor Divisions

INTRA-COMPANY COMMUNICATION

SUBJECT 5K Asbestos from Chicago

DATE May 14, 1968

TO H. North

Enclosed are samples of asbestos from bags received from Chicago. The material is not processable.

Since your receiving inspection is accepting finished Victopac to a 1% AQL, I truthfully cannot use this type of material at all. It appears to have gotten wet and then walked on.

Consequently, we will be unable to use any of the 25,000# of asbestos remaining in your warehouse unless you can guarantee its quality as to moisture content.

As soon as we determine how much of the material on hand from Chicago that we cannot use, we will inform you.
