The attached excerpt from the May 12, 1969 OPD serves as further evidence that the USDA is tightening and will continue to tighten its enforcement of the Federal Insecticide, Fungicide and Rodenticide Act. This particular article mentions only pesticides but, as you know, institutional and household germicides also fall under the act.

USDA officials probably found Chairman Fountain's remark, "You make the FDA look good," especially cutting. Comments of this nature from the government operations investigation subcommittee chairman might tend to spur increased Department activity in all areas including germicide registration.
