Re: Revised Research Proposal Entitled, "Responses of Lactating Dairy Cows to Polychlorinated Biphenyls", Dr. Lynn B. Willett, Principal Investigator. (OSURF Proposal Reference 17009-55-00)

Dear Mr. Metzger:

In accord with your letter of August 26, 1983, enclosed are two executed originals of the contract relating to the proposal referenced above. We have modified the contract to make it more consistent with the proposal.

Paragraph 8 represents the only real substantive change to your original draft. We have omitted much of the original draft's language regarding patents. The nature of this research is such that we do not feel a need for extensive patent coverage.

I hope you find this satisfactory so that we can accelerate the initiation of this project.

Would you please have both of the originals executed and return one to me for my files.

Very truly yours,

Dr. John H. Craddock, Director
Product and Environmental Safety
