Following our various meetings with GE and Westinghouse their people are now about as busy as ourselves with the PCB situation and are calling us for information.

1. Ed. Raab, GE, Pittsfield, Mass. requests list of all legal suits so far placed against Monsanto. Reason for the suit, location, amount and status. Also, do we expect additional suits? Please handle this request from GE.

2. Westinghouse called for refinement and confirmation of annual pound use data for capacitors and transformers. They are preparing to join GE, McGraw Edison and others in a call on the National Ind Pollution Control Council to get Government accord for the continued electrical use of PCB.
