

INTRACOMPANY CORRESPONDENCE

R-98 (Rev. 1-68)

PLAINTIFF'S
EXHIBIT

RMC-397

FROM:	C. D. Hester - San Patricio
TO:	H. M. Cole - Industrial Hygiene, Richmond
COPY:	G. W. Dressen, R. C. Esterline
DATE & SUBJECT:	October 23, 1985 Samples For Asbestos Determination

In accordance with our phone conversation today, I am sending you four samples of insulation. Please have an analysis made on these materials to determine if they contain more than 1% asbestos. Our plant records indicate that all of these samples are either asbestos or asbestos-containing materials. Listed below is a description of the samples.

Sample No.	Description
MC-8522	Insulation removed from side of mixer #10 in Carbon Plant
MC-8523	Insulation removed from steam line to mixer #10 in Carbon Plant
MC-8524	Insulation removed from steam line at boiler #2 at Boiler House
MC-8525	Insulation removed from natural gas line in Bldg. #42 at Power Plant

Note: All samples above were collected October 23, 1985.
