Mr. R. B. L. Fleming
Industrial Hygienist
Occupational Health Branch
Tennessee Valley Authority
Wilson Dam, Alabama

Dear Mr. Fleming:

In accordance with your request of November 12, I have enclosed a statement which summarizes animal toxicity data and our evaluation of possible hazards involved in the use of Pydraul 625.

I am sorry that I cannot divulge the composition of this fluid since it is one which has been developed jointly with a second company which will not allow composition disclosure.

I hope you will find, however, that the data and our interpretation is sufficient to allow safe handling and usage of this fluid.

Very truly yours,

Jack T. Garrett, Manager
Industrial Hygiene
Medical Department
