Attached is a draft of the proposed letter to the CPSC. At present I plan to send essentially the same letter to the EPA unless something else appears more effective. Please review this draft and have comments of alternative wording available for pass-out at the meeting on December 12, 1979.

I have also enclosed the listing of the divisions which have replied to our first letter regarding comments on the use of asbestos. Unfortunately, our letter was not received by many divisions until after Thanksgiving, therefore most of them have not had time (or maybe have not felt the necessity) to reply.

John F. Gormley, Director
Product Safety & Integrity
