Q What information would you, have you seen the literature that you would rely on in support of that opinion?

A Oh, there's a number of papers. I think the most outstanding one would probably be the publications of two guys called Pedo and Dole(phonetic), and they are out of, originally out of Britain, and did some really good epidemiology work.

Q Okay. Did you know a Ford employee, a Ford employee by the name of Henry Lick (phonetic)?

A Yes, I did. Yes, I do.

Q What's his, what was his role with Ford in the '70s?

A In the '70s?

Q What was his job?

A Let's see. Well, he retired from Ford as a manager of Industrial Hygiene, and he worked his way through the industrial hygiene process. So I'm not exactly sure what his title was in the 1970s. He may have changed it a couple of times.

Q Okay. Fair to say, he was an industrial hygienist before?
