Congratulations on your promotion! I'm sure it will keep you busy.

As you have probably heard by now, the imports of PCB's are increasing, particularly since the first of the year.

The duty on PCB's is 1.7¢ plus 12.5% of the American Selling Price. The end use has no significance.

If the Therminol FR products are discontinued and there is no American Selling Price, the appraiser will develop a United States value which is a synthetic American Selling Price. He would not use remaining PCB prices or the last known ASP for Therminol FR.
