You'll save capital costs.

Without pressure, you can save 25% or more. That's because you don't need heavy piping, valves or other high pressure devices. In some cases, Therminol systems give savings as high as 50% over vapor phase.

You'll save operating costs.

hout high pres- no fluid make- normally re- uired. Temperature and heat losses expected with vapor simply don't happen. And routine maintenance is minimized. In many locations, codes favor Therminol systems, thus eliminating the need for expensive operating personnel.
