Dr Elmer P Wheeler
Monsanto Company
800 N Lindbergh Boulevard
St Louis, Missouri 63166
U S A

Dear Dr Wheeler,

Thank you for your letter of March 18. I have the visit to the Monsanto Co and St. Louis in a good memory, so very good that I was eager to give you the earliest report of the PCB's found enriched in nature. Although, this information was not too encouraging to a producing company I do hope you appreciated that I sent a copy of Dr Jensen's lecture.

Due to a number of very unfortunate reasons the manuscript of a paper by Dr Jensen and myself has not been sent to the editor of Acta Chem.Scand. This does not mean that we have stopped the PCB research, on the contrary, we have increased our efforts to separate further the very great number of PCB's found in an increasing number of biological samples. Moreover, we have got a new on-line data acquisition system to our GC/MS instrumentation.

In case Dr Keller would visit Stockholm we will be most happy to see him and his colleague at this institute. Please let me know when Dr Keller intend to go to Sweden. I shall be in USA and UK October 2-20.

Sincerely yours,

Gunnar Widmark
