AROCLOR PROCESS - WGK
TENTATIVE AMENDMENT NO. C

WGK - Dallis Armstrong
G. R. Buchanan
WGK - P. Heisler
J. Mullendore - JMULL
C. N. Williams

R. S. WOBUS - RWOBU

As agreed with John Mullendore, before the Aroclor 1242 produced with the catalyst basket removed from the chlorinator is shipped as electrical grade it will require evaluation and acceptance by a customer.

Pursuant to this, Electrical Utilities agree to isolate an impregnating line to commercially evaluate and life test the Aroclor 1242 made according to Process Amendment No. C.

We, in turn, are furnishing EUC with 26 drums Aroclor 1242, no charge, but EUC will pay the freight costs.

By copy of this memo, we rely on Mr. Mullendore to arrange for the production of the 26 drums and to advise C. Williams of specific lot number assigned these 26 drums of Aroclor 1242.

We need be sure that the proper material gets shipped.

Thank you.

Paul G. Benignus
