CONTACTED: G. Dominguez and N. Anderson

PURPOSE: Review status of dye carrier

RESULTS: Reviewed the test results on HB-30, HB-40 and MIPB showing their failure as a potential condidate for the dye carrier. None of the candidates did a satisfactory job compared to Aroclor 1221. Ciba is not interested in the biphenyl carrier as a "me too". They want their proprietory product and seek a pure source of meta methyl biphenyl. We told them we could not supply the methyl biphenyl. They will not use an chlorinated biphenyl including MCS 1109 at present. George said they would evaluate other candidates we have to offer and would reconsider MCS 1109 at a later date provided we have more biodegradability data or if we don't come up with another suitable product. In the meantime they are looking for a replacement product.

FOLLOW UP:

J. Bryant
1. Keep contact with Dominguez and Anderson.
2. Move Aroclor 1221 out of Cranston.

C. Paton/D. Pogue
1. Please keep me posted on samples etc. sent to Geigy.
2. What are we getting on biodegradability and as replace- products containing no halogens.
