TO: Bill Schindler
FROM: Joe Rokos
SUBJECT: Victacor 300 with Weldable Fire Ring Design.

George Gambino was very helpful in solving several problems found with subject design. It started with Victor 3847 failure from Caterpillar. It resulted in taking corrective measures on 13 other parts.

We appreciate the extra effort George put forth in getting to the heart of the troubles.

Getting started in manufacturing on the right foot is important. Could you have George list his findings for Manufacturers' future reference?

Please extend our special thanks to George for his help.
