FRICTION MATERIALS RESEARCH

December 11, 1975

To: Mr. R. E. Nelson

Subject: Formula 192-105 Disc Pads from Hayes-Albion

Winchester is planning to buy disc pads in Formula 192-105 from Hayes-Albion. We have been given three pucks and one 728A set for test. We will run the three samples on our Chase Machine to check the edgecode and the 728A pads will be run on our Firebird to check performance.

These pads are marked with the following edgecode- "ABL 411 FF". We understand that Certification was not done through your office or by the Engineering Test Center in Mahwah.
