ANIMAL DISEASE DIAGNOSTIC LABORATORY

August 9, 1976

Dear Doctor:

You were recently alerted to the problem of PCB residues in milk originating in silos constructed of cement staves and sealed with "Cumar". The attached form is to be used when samples are submitted to the Animal Disease Diagnostic Laboratory for PCB analysis.

In order to supply you adequate numbers of this form please tear off and return the form below. I suggest that you request a supply of these forms if you have clients who are dairy or beef farmers with cement-stave silos.

If I can be of any assitance to you, please call me at 317-749-2496.

Sincerely,

F. R. Robinson, D.V.M., Ph.D.
Extension Veterinarian
(Toxicologist)
