Mr. Edward Poleselli
Vivion Chemical Company
3000 E. 46th Street
Vernon, CA 90058

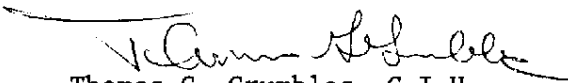

Dear Mr. Poleselli:

Following is a response to your inquiry regarding the presence of California Proposition 65 chemicals in the Vista Chemical products you purchase. My understanding is that you purchase ALFOL 16 and 18 (flaked) Alcohols, ALFOL 12 Alcohol, and ALFONIC 810-60 Alcohol Ethoxylate.

Based on the analytical data available and current analytical detection limits, the ALFOL Alcohol products contain no Proposition 65 chemicals.

The ALFONIC Alcohol Ethoxylate may contain detectable quantities of ethylene oxide. The level is typically below 1.0 ppm although it may vary. The manufacturing process is controlled to reduce the residual ethylene oxide content.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

ATTN: Mike Wren

Dear Mike:

At the request of Andrew Smith, the following information is provided. Vista ALFONIC Alcohol Ethoxylates may contain detectable amounts of ethylene oxide. The level may vary but is typically below 1.0 ppm. The manufacturing process is controlled to reduce the levels of ethylene oxide.

Sincerely,

Thomas G. Grumbles, C.I.H.
